

Are you ORANGUTAN-friendly?

In Will You Miss Us If We Go? We heard from the orangutan which pointed his finger at the "palm-growing racketeers". Let's do a little digging to find out what this is all about:

Where is the orangutan's habitat?

Who is destroying their habitat?

Are there other problems too?

Visit the Cheyenne Mountain Zoo site: CMZoo.org and search for the orangutan and download the Sustainable Palm Oil APP. Or, look at the pages listing products that are palm-oil friendly. This is an example of how we can help...even though this endangered species is on the other side of the world.

How can our buying habits change to support endangered species?
